

**ROCK ASPHALT®**

# USED TO PAVE ROADS SINCE 1895, ROCK ASPHALT® HAS NOW BEEN RE-ENGINEERED TO REPAIR ROADS

## **35% More Coverage**

Our one-of-a-kind native asphalt cuts costs without sacrificing performance. Plus it's VOC-free.

## **Guaranteed 3-Yr Longevity**

Unique binding action prevents failure in high-volume or heavy load traffic. Warranty-backed for 3 years.

## **All-Weather Reliability**

Stays workable and durable year round and in all climates. Performs in rain, snow, or heat.

We at RockAsphalt® know how much the world depends on well-functioning roads and runways. That's why we've made it our mission to provide municipalities, contractors, and corporations with a quality pavement patch they know they can trust. By serving the individuals who maintain our infrastructure, we do what little we can to help keep the world productive, secure, and connected.

## NATIVE VS MANUFACTURED ASPHALT

The bituminous limestone deposit we mine in southwest Texas may be one of the largest natural asphalt formations in the world, but it's certainly not large enough to pave all 42.1 million miles of roads on Earth. That's why when most people think asphalt, it's manufactured, not native asphalt that comes to mind. In other words, people imagine a tarry black substance — one created from a mix of sticky crude oil and gravel — not our native asphalt composed entirely of dry-to-the-touch rocks. And if you care about road repair, that difference matters.
